3- Several international congresses meetings of internal medicine in Beirut-Lebanon, Dubai-UAE.

4- Several international congress meetings in Baghdad, Basra, Thi-Qar / Iraq.

Statement

I have relished the opportunities I have had in contributing to science and enhancing training opportunities at both undergraduate and postgraduate levels. I have had the privilege to experience what it takes to build a successful regional board of medicine training unit in a country often facing many logistical and political challenges. If successful in my nomination for fellowship of the Royal College of Physicians of Edinburgh, I would endeavour to take this opportunity to expand our current work through collaboration and one hopes in introducing the MRCP UK exam into our curriculum to make our specialty more appealing for future trainees.
