PROFESSOR OF INTERNAL MEDICINE M.B.CH.B , C.A.B.M(INTERNAL MEDICINE). M.A.C.P DEPARTMENT OF MEDICINE _THI QAR COLLEGE OF MEDICINE

Career Aspiration:

As a nephrologist, I aspire to work in a specialized center where I can engage in a multidisciplinary approach to managing complex renal diseases. I am eager to participate in daily educational lectures and clinical meetings that foster continuous learning and collaboration with experts across various specialties.

I have a particular interest in advancing my expertise in kidney disease management, including areas like renal transplantation, chronic kidney disease, and hypertension. My goal is to improve patient outcomes by applying evidence-based practices and innovative therapies that address the evolving needs of individuals with kidney disorders.

In the long term, I aim to contribute to nephrology through research, becoming a highly cited author in the field. I envision a career that combines patient care, academic research, and the advancement of clinical practices to improve the lives of patients with kidney disease.
